PROFILE

Software Engineering undergraduate with hands-on experience in full-stack web application development, building responsive and scalable applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Skilled in frontend and backend development, REST API integration, database-driven application development, and deploying modern web applications using Git, Docker, Vercel, and Render. Familiar with cloud fundamentals and AWS, with a solid foundation in software engineering principles, debugging, testing, problem solving, and modern development workflows. Practical project experience includes AI-powered applications, resume/job matching systems, and booking platforms, with a strong interest in developing scalable, efficient, and user-focused software solutions.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python
- **Frontend Development:** React.js, Next.js, HTML, CSS, Tailwind CSS, Flutter
- **Backend Development:** Node.js, Express.js
- **Databases:** MongoDB, Firebase, Supabase
- **Testing Tools:** Selenium, Playwright, Postman
- **Tools & Platforms:** Git, GitHub, Figma, Docker, Vercel, Render, Linux
- **Cloud:** AWS Fundamentals

PROJECTS

- **Smart Email Writer – AI-powered Email Generation Tool**

  Tech Stack: React.js, Node.js, JavaScript, OpenAI API

  - Developed an AI-powered web application that generates complete professional emails from short user prompts.
  - Implemented tone-based email generation (e.g., formal, friendly) using the OpenAI API to produce context-aware email content.
  - Built a responsive frontend and integrated backend API services to support real-time email generation.
  - Deployed the frontend using Vercel and backend services using Render for reliable hosting and API handling.
  - Improved user experience with features such as copy-to-clipboard, clean UI interactions, and responsive design.

  Live Demo: Quickmail
  GitHub: Quickmail

- **JOBALIGN – AI Resume Matching Platform**

  Tech Stack: Next.js, React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Stripe

  - Developed an AI-powered career platform that analyzes resumes and matches users with relevant job opportunities.
  - Implemented semantic job matching and AI-driven resume feedback features to improve job application quality.
  - Built a responsive frontend using Next.js and Tailwind CSS, focused on usability and modern UI design.
  - Designed and developed scalable backend services with Node.js and Express.js to manage application logic and data flow.
  - Integrated Stripe for subscription management and implemented an application tracking workflow for users.

  GitHub: Jobalign

- **Cinemax – Movie Booking Web Application**

  Tech Stack: MongoDB, Express.js, React.js, Node.js, Docker, GitHub Actions, TMDB API, PayHere

  - Built a full-stack movie ticket booking platform using the MERN stack, allowing users to browse movies, view showtimes, select seats, and book tickets online.
  - Integrated the TMDB API to fetch and display movie information such as posters, ratings, and descriptions.
  - Implemented key booking workflows and validated core functionality including movie browsing, seat selection, booking confirmation, and payment flow.
  - Used Docker to maintain consistent development/testing environments and GitHub Actions to support CI/CD workflows.
  - Improved application reliability by testing major user flows and verifying fixes for functional and UI issues.

  GitHub: Cinemax

CERTIFICATES

- AWS Cloud Practitioner Essentials – AWS Skill Builder
- Python for Beginners – University of Moratuwa

EDUCATION

GCE Advanced Level – Mathematics Stream 2023
Dharmapala Vidyalaya, Pannipitiya

Diploma in english 2023 - 2024
Esoft Metro Campus

Bsc (Hons) in Software Engineering 2023 - PRESENT
NSBM Green University / University of Plymouth

CLUBS & SOCIETIES

NSBM Media Club

- Executive Member
